
SIXTH ADDENDA TO CRITICISM OF THE CURRENT SCIENCE IN THE WORLD

Pejman Malekinejad

From TUV NORD Iran Company

ABSTRACT

Again this article is as a proof to my previous papers [1 to 8] which approves and confirms them internationally. Some of my recent honors were mentioned. Also some parts of Iran scientific problems were assessed. It was concluded that Iran (and I) will not become anything in the science, I do not have any intelligence and Iran (and I) will not become anything in general. Also it was suggested that the only way for the general advancement of Iran is to make Iran as a state of USA politically.

Key Words: Superpowers, Encyclopedia, Science, Depressive Realism.

1. INTRODUCTION

Voice of America (VOA Persian) has issued an article [9] that is in the same line with this paper. In fact, that article from VOA Persian confirms this paper. Also Eminent Crown Prince of Iran, Reza Pahlavi has a saying from Atamalek Joveini about Iran Islamic Regime as “They came and dug and burned and killed and took away and went” [10] which approves this paper.

2. DISCUSSION

As illustration of “THE ENCYCLOPEDIA OF WORLD PROBLEMS AND HUMAN POTENTIAL” [11], one can say that problems included are those identified in international periodicals but especially in the documents of some 70,000 international non-profit organizations, profiled in the “Yearbook of International Organizations” [12]. It is interesting to know that these organizations are in all branches of science like political sciences, welding sciences, corrosion sciences, petroleum sciences and etc. Examples include:

- APSA - American Political Science Association [13]
- IPSA - International Political Science Association [14]
- IWP - Institute of World Politics [15]
- APLS - Association for Politics and the Life Sciences [16]
- NACE - National Association of Corrosion Engineers [17]
- AWS – American Welding Society [18]
- ASME - American Society of Mechanical Engineers [19]

- ASTM - American Society for Testing and Materials [20]
- SPE - Society of Petroleum Engineers [21]
- ASM - American Society for Metals [22]

And etc. The complete list of all the organizations listed in the “Yearbook of International Organizations” is in its website [12] which is searchable. I mean that the most reputable and valid international organizations have mentioned their problems in this encyclopedia. Therefore this encyclopedia is very reputable and valid. Also this encyclopedia is very valid and reputable in all branches of science.

“The Encyclopedia of World Problems and Human Potential” is a collaboration between “Union of International Associations (UIA)” [23] and “Mankind 2000”, started in 1972. The “Union of International Associations (UIA)” is a research institute and documentation center, based in Brussels. It was established in 1907, by “Henri la Fontaine” (Nobel Peace Prize laureate of 1913), and “Paul Otlet”, a founding father of what is now called information science. Non-profit, apolitical, independent, and non-governmental in nature, the UIA has been a pioneer in the research, monitoring and provision of information on international organizations, international associations and their global challenges since 1907. Therefore you can see that UIA is very valid and reputable.

I have mentioned one of the world problems from this encyclopedia as “A CONSIDERABLE AMOUNT OF SCIENTIFIC RESEARCH IS CONDUCTED IN INSTITUTES OR UNDER CONTRACTS WHICH PRECLUDE DISSEMINATION OF THE RESULTS TO OTHER THAN A SELECT GROUP” [24] in one of my papers titled “Fifth Addenda to Criticism of the Current Science in the World” which was published in an international journal of “International Journal of Sociology and Political Science” [8]. Therefore you can see that a large part of discovered science is kept secret. So Iran (and I) will not become anything in the science, I do not have any intelligence and Iran (and I) will not become anything in general. Therefore according to the principles of DEPRESSIVE REALISM, I must always be happy. I invite all those Iranians who think that they are great minds of the world to look at other world problems mentioned in this encyclopedia the number of which now exceeds 56,000 [25] (and is searchable by subject). They will certainly not be able to solve the world problems mentioned in that encyclopedia. I cannot also solve those problems. Therefore my previous papers [1 to 8] are confirmed and approved since they were based on this fact that “a large part of discovered science is kept secret”.

I am recognized as “TOP FAN” in top and prominent “FACEBOOK” pages of the following list. I am happy and proud of them. It is a great honor for me.

- DEAR EMINENT MRS. IVANKA TRUMP WHO IS THE DAUGHTER OF THE PRESIDENT OF USA.
- BBC NEWS

- BBC PERSIAN
- BBC SPORT
- CNN INTERNATIONAL
- ENTERTAINMENT TONIGHT
- THE TELEGRAPH
- VOA PERSIAN
- FOX BUSINESS
- FOX NEWS
- VOISFARSI
- THE THREE STOOGES
- YASMINE PAHLAVI
- BEHROUZ VOSSOUGHI
- MASIH ALINEJAD
- EBI (EBRAHIM HAMEDI)
- MAHLAGHA JABERI
- THE LAUREL & HARDY BLOG

Also special thanks to Mark Zuckerberg (the inventor and CEO of FACEBOOK). The photos of print screens from these FACEBOOK pages are collected and shown in a separate file which shows that I have been selected as TOP FAN in their FACEBOOK pages [26].

In my previous paper [8], I have mentioned a great quote from Her Highness Mrs. Ivanka Trump, The daughter of Dear Eminent Mr. President Donald J. Trump who is currently the senior advisor to the president of the United States, as “THE KEY TO JOB CREATION IS INNOVATION” [27] and I said that there is nothing as innovation in Iran. As I have previously mentioned [1 and 3], the highest level of Iranian scientists in the field of inspection and corrosion in the oil and gas industry have and use the following files (books) all of which are USA innovations. Iranians do not yet have innovations like these files (books) to be used and accepted internationally.

- AWS Welding Handbooks (All Volumes)
- NACE CP1, NACE CP2, NACE CP3, NACE CP4,

- NACE CIP I, NACE CIP II
- ASNT NDT HANDBOOKS (Volumes 1 to 10)
- ASM Metals Handbooks
- Publications from AWS, ASME, API, NACE, AWWA, NFPA, ASTM, TEMA, SSPC (SPC), ABS, AAR, AASHTO, AISC, AREA, NBBPVI UBPVLS, FED, PFI, SAE, UL, MSS SP, ASNT,

It shows that Iranians do not have any innovation. This fact is true for all other branches of science (except humanities as I have previously mentioned [7]) in Iran whose main books are USA innovations. In the case of metallurgical sciences, let's have a look at the "KEY TO STEEL" reference handbook [28] which includes more than 70,000 standard designations and trade names from approximately 300 steelmakers and suppliers from 25 countries. There is a link [29] from official site of "KEY TO STEEL" which introduces the 25 countries who have invented these steels. According to this link, these 25 countries are: Australia, Austria, Brazil, Bulgaria, Canada, China, Czech/Slovak Republic, Finland, France, Germany, Great Britain, Hungary, India, Italy, Japan, Republic of Korea, Norway, Poland, Romania, Russia, Serbia, South Africa, Spain, Sweden, USA. As you can see, Iran does not lie within the countries who have invented steels. I.e. Iran has no innovation in the field of materials science and engineering. In general, for a person to be able to innovate, he/she must have the highest level of science. Iranians have no innovation since they do not have large amounts of science. In fact, Iranians cannot innovate like superpowers since a large part of discovered science of superpowers is kept secret and Iranians do not have access to them as I have previously illustrated in my papers [1 to 8] and here in this article. Iranians do not have the science as much as that of the superpowers. Again one can see that Iran does not have any innovation in the field of materials science and engineering. In Iran we have access to only a small part of the science which is discovered by superpowers. In this way Iran will always remain a dependent, retarded and underdeveloped country who follows superpowers. The politics of world is such that a country like Iran will always be dependent to the superpowers for its advancement and development and will always need them. Therefore the slogan of "Down with USA" from Iranians is in fact "Down with Iran". I clear here that this slogan is not my slogan and in fact I love USA. Her Highness Mrs. Ivanka Trump is a strong person and is an American businesswoman, fashion designer, author, and reality television personality. Her Highness books are "WOMEN WHO WORK" in 2017 and "THE TRUMP CARD" in 2009. I love Her Highness Mrs. Ivanka Trump. I have written a message in FACEBOOK to Her Highness Mrs. Ivanka Trump as follows:

""((Charity))

Your Highness Mrs. Ivanka Trump,

Hello. Thanks a lot for recognizing me as TOP FAN in Your Highness FACEBOOK page. I am a wretched, sick and poor man who suffers from schizophrenia for more than 14 years. Due to this disease I have failed in all aspects of my life like education, job, friendship, family and etc. I live in a disgusting conditions. My manuscripts of psychiatrist can be found in links in my website [30, 31]. I eat the drugs of OLANZAPINE and RISPERIDONE which are very hypnotic

and therefore I am asleep most hours of a day. I am very poor so that I cannot buy a house and therefore I live with my parents who are very old and they also do not have money. But I need money to survive (to buy house and car, to buy food, furniture, cloth and etc.). I know that Your Highness control many charity organizations in the world. Could Your Highness please help me by sending money to me? I need a salary of at least 3000 USD per each month to live. All other types of financial helps and charity are greatly appreciated.

Meanwhile, I have said in my articles titled “Criticism of the Current Science in the World” and “its 7 addenda” in my website [32] that I will not become anything in the science, I have no intelligence and I am nothing in general. Therefore according to the principles of DEPRESSIVE REALISM, I must always be happy.

If Your Highness want to send money to me, then please let me know to give Your Highness a bank account for transferring money.

Your Highness are a GREAT and kind human. Thanks in advance for Your Highness kind donation.

Kind Regards,

PejmanMalekinejad. ”””.

In the case of the recent Killing of Iranian Gen. QassimSoleimani, the head of the Islamic Revolutionary Guard Corps' elite Quds Force by USA, I can say some points as:

- Special thanks to USA and Dear Eminent Mr. President Donald J. Trump for this mission.
- A man should be very stupid to fight USA. It shows that Iran does not understand the gigantic power of USA.
- What the hell he was doing in Iraq? He was doing terrorist and destabilizing activities and roles in foreign countries with the Iranians money. Why should Iranian leaders spend so much money in that way and waste the money which belongs to Iranians? He deserved the death. DOWN WITH him and other Iranian leaders. Also he was the cause of many sanctions against Iran.

Recently a Ukrainian passenger airplane has been shot down by Iranian missiles mistakenly which led to death of 176 people in Tehran, Iran. It clearly shows the lack of science of military and defense in Iran. In Iran, we have access to only a small part of superpowers sciences and you can see that Iran cannot manage defense systems like superpowers.

I have previously mentioned some facts about huge assets of Iran leader (Khamenei) [7]. For further resources in this case you can search the keywords of “ASSETS OF KHAMENEI” in Google search engine or you can search in Farsi language and you will know his huge assets. US Embassy Baghdad has reported the assets of Khamenei as 200 Billion USD [33]. It is noticeable that if you search the richest people in the world in Google and in English language, then you will find that Mr. Jeff Bezos as the richest person in the world has a worth of 108.6 Billion USD. It means that the worth of Khamenei is more than worth of Mr. Jeff Bezos (approximately twice

more). We should consider that Khamenei has obtained this money from Iran in which the wages are in Rial that is very low in USD. I have previously [1 to 8] said that Iran universities are established to make people busy with science and for them not to think of politics. In this way the political rulers of Iran will have no competitors. Money and other advantages of politics is higher than any other activities in Iran. Khamenei is nothing more than a thief. Then where is my money?

There is a famous song from Iranian singer of “GOOGOOSH” titled “Ma Beh Ham Mohtajim” in which she describes the phenomenon of DEPRESSIVE REALISM in the best way. This song can be listened in YouTube [34]. It says that “... We need each other like insane who needs sleep ...”. When a person marries, he/she wastes his/her time with growing children and studies less and according to the principles of DEPRESSIVE REALISM he/she will be happy. The drugs for schizophrenia like OLANZAPINE and RISPERIDONE are also very hypnotic for the patient to sleep and study less and according to the principles of DEPRESSIVE REALISM he/she will become happy. In fact those drugs turn a scientist in to a crazy human. This is the truth of psychiatry and psychology. Anyway I do not want to continue education since I will not become anything in the science as I have illustrated here in this article and my previous papers [1 to 8]. When I was a student at Petroleum University of Technology, the university gave the textbooks in English to us. Today I put all of them in 2 bags each of 50 kg to sell them as waste paper. I have no books from the time when I studied for MS degree. Also I have no book in my laptop. Therefore according to the principles of DEPRESSIVE REALISM, I must always be happy. In general, the mental disorders belong to societies of advanced world superpowers who have the high and ultimate amounts of science (Like USA and UK). In Iran as a retarded and underdeveloped country, we have no mental disorder. It cannot be believed that one catches a mental disorder in Iran. In Iran we have access to only a small part of superpowers sciences as I have mentioned in this article and my previous papers [1 to 8]. This is true for Iranian arts. I.e. the Iranian arts with the subject of DEPRESSIVE REALISM, are not suitable for Iran society as illustrated above.

3.CONCLUSION

The only way that I strongly suggest for the scientific and economic advancement and development of Iran in all fields (including politics) is to make, regard and announce Iran as a state of USA (United States of America) officially and politically (and totally). I.e. Iran should make and regard itself as a state of USA (United States of America) politically (and totally). I have heard that this idea was first suggested by His Majesty Mohammad Reza Shah Pahlavi for Iran.
